-----

These modules are perfect for on-grid solutions, providing reliable power for your applications. They are fully customisable and versatile, suitable for almost any on grid application.

Today, there is relatively little battery production in Norway, which is critical for improving supply security both domestically and across Europe.

To sprawia, że jest to idealny wybór dla branż zlokalizowanych w regionach gorskich lub na wzniesieniach. Dzięki mocy znamionowej 30KW i kompatybilności z częstotliwościami 50Hz i 60Hz, seria

This air-cooling outdoor cabinet is now available on the market with a 30kW hybrid-coupled system, capable of both on-grid and off-grid operations. Additionally,

Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications.

Designed to withstand cold climate: The Nordic region's infrastructure is designed for cold temperatures, helping BESS installations maintain stable internal conditions. Project owners need to

The Mini C&I ESS has numerous applications such as Microgrid, backup, off-grid peak shaving, time of use, self-supply, demand response, and Virtual Power Plant (VPP).

These systems are fully equipped with battery racks, AC/DC panels, HVAC systems, fire detection and suppression systems, and UPS. The intelligent combination of photovoltaic and battery storage with

Getting your utility-scale solar project connected to the Norwegian regional grid involves a series of essential steps, ensuring smooth integration with the power system.
